

PASTORAL FARMING RANGE

At Ecolighting Systems we offer a comprehensive range of lighting which is designed for the Pastoral Agriculture sector.

Lighting in the Pastoral Farming sector is critical for meat quality and animal welfare. The quality of meat can be directly related to the welfare of the animal and a major factor in this is the quality and quantity of light the animal is exposed to.

At Ecolighting Systems we offer a comprehensive range of lighting which is designed for these sectors. Robust and suited for the aggressive atmospheres of cattle barns or poultry sheds our lighting requires minimal maintenance and enhances meat production using the latest lighting technology.

PRIMO XR 107

Gas-tight LED tubular light fitting

Hermetically sealed light fitting with integrated quick connector. The PRIMO XR LW easily handles even the highest ammonia pollution in pig fattening and rearing, dairy and poultry sites. In addition, it is water pressure tight and suitable for high pressure cleaning (IPX9K tested).

LUXANO 2 167 G2

LED damp-proof light fitting

The damp-proof LUXANO 2 is a cost effective and efficient lighting solution that offers a service life of more than 50,000 hours at the maximum admissible ambient temperature and a high luminous efficacy. Ammonia and corrosive resistant LUXANO is also IFS compliant and has been certified for use with the DLG (German Agricultural Society).

DUEVO

An increased gas resistance high bay solution ideal for barns and sheds with high roofs, typically 6m or greater. The DUEVO is also robust and can withstand high fluctuations in temperature from -40 degrees to +60. Ideal for exterior, exposed applications.
